

Identity Lifecycle (JML)

Performance Dashboard — Joiner-Mover-Leaver Automation Program

Week 6 | Prepared by: Business Analyst, IAM Operations

JML Event Volume — This Reporting Period

870 total lifecycle events processed | 100% automated trigger coverage

Joiner Events (provisioned)

420 events

Mover Events (reconciled)

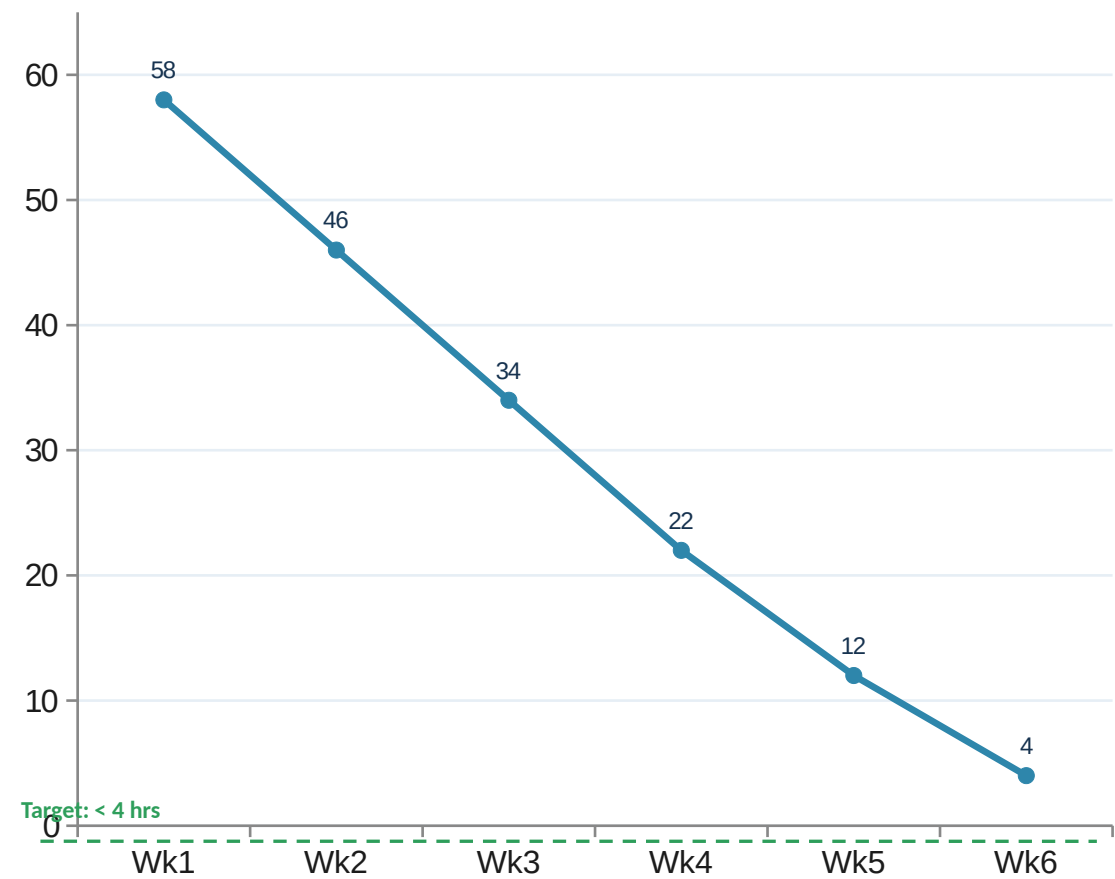

260 events

Leaver Events (deactivated)

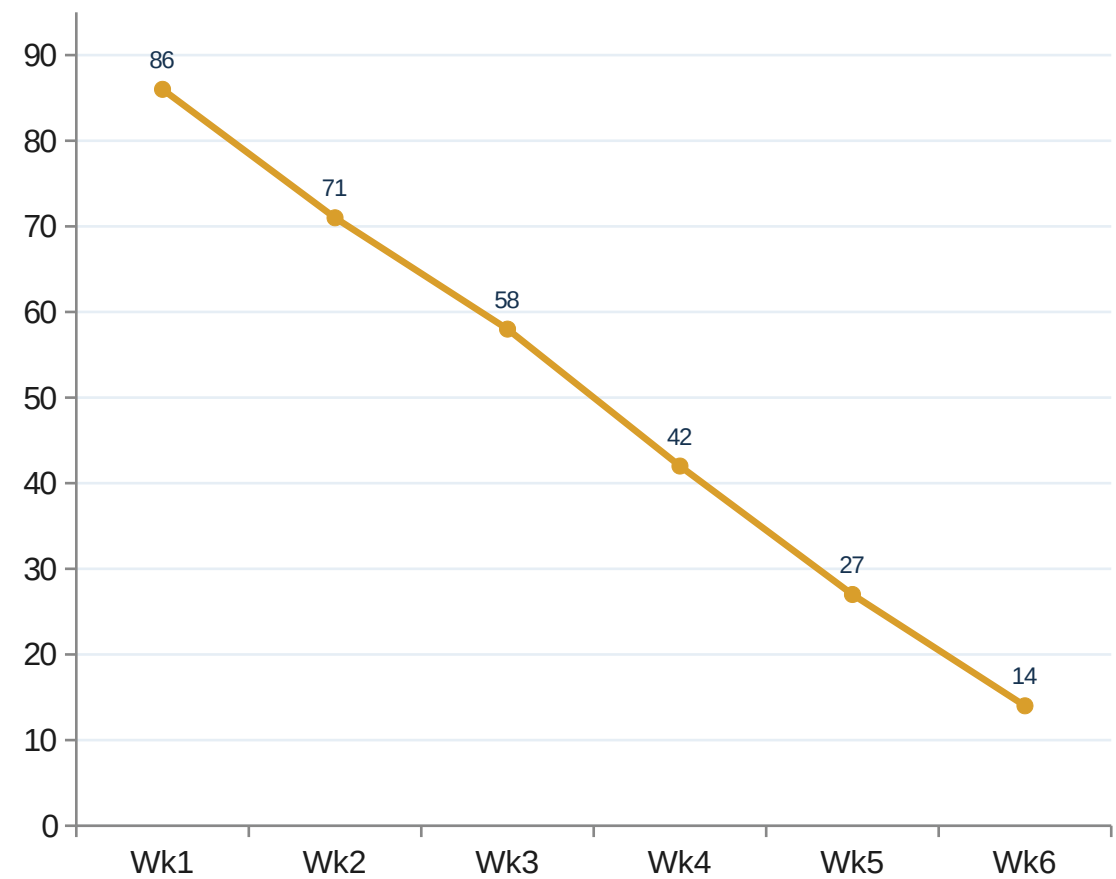

190 events

KPI Trends — Deprovisioning Speed & Orphaned Access (6-Week View)

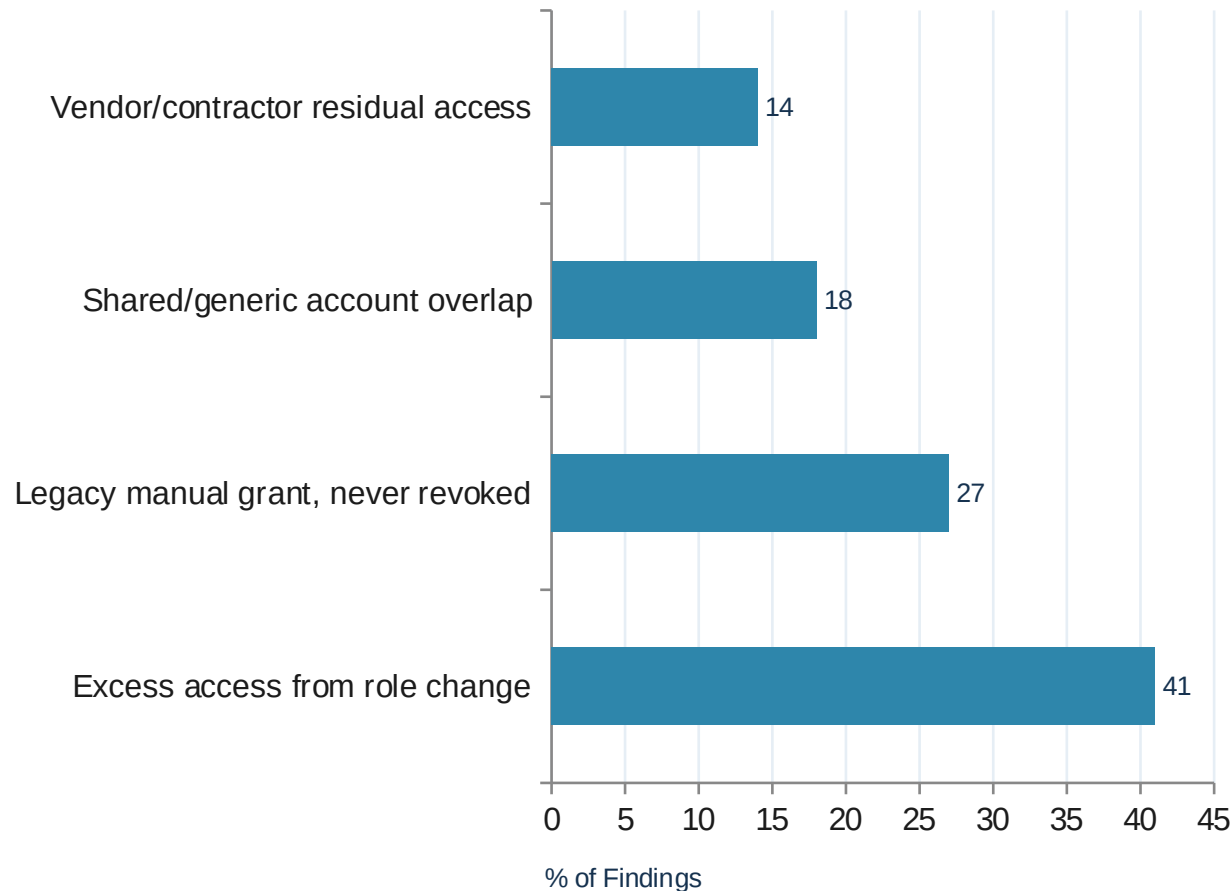

Avg. Deactivation Time on Termination (hours)

Open Orphaned Access Instances

Segregation of Duties (SoD) Findings & Recommended Actions

What This Tells Us

- ▶ Nearly 70% of SoD findings trace to role-change and legacy-grant scenarios — both directly addressed by automated reconciliation (FR-02).
- ▶ Vendor/contractor residual access is a smaller but recurring category, suggesting a future-phase extension of JML scope.

Recommended Actions

- ▶ Prioritize automated role-change reconciliation (FR-02) in Phase 1 to close the largest finding category.
- ▶ Run a one-time cleanup pass on legacy manual grants predating the RBAC model.
- ▶ Scope a Phase 2 extension of JML automation to vendor/contractor accounts.
